pCon.roomplanner – Tailored Solutions

The pCon.roomplanner is a smart, straightforward and customizable platform for online interior design. According to your personal needs we will integrate the pCon.roomplanner into your website and adapt it to your corporate design.

We include all relevant information, take care of the localization as well as the configuration of the planning scenarios. We connect our software to your online shop or merchandise management and determine storage as well as distribution of the planning. The planning details can be displayed as an article list or a printout.

We will be pleased to **advise** you. Get more information about your suitable compilation for an individual price now!

The following list includes all possible configuration of the pCon.roomplanner.

Important Details

Integration of the corporate logo	The company logo can be customized and displayed at the upper left corner of the user interface if desired. The integration of a link is also possible. Corporate logo and name can also be shown on the related browser tab.
Company details	Display important facts about the company as well as the terms of use either in pCon.roomplanner or link to an alternative website.
News	Inform the users of your planning tool about the latest news. You can also set a link within the news ticker.
Tracking	By using the web analysis tool MATOMO you can study the user activities.

Integration of the pCon.roomplanner into Your Sales Processes

Integration into a shop system	Your customers will easily find the way to your online shop, if you use the OCI export. We gladly advise you on the possibilities for the integration of pCon.roomplanner into your shop system or inventory management system.
--------------------------------	--

Design of the User Interface

Color scheme	Adjust the pCon.roomplanner to your corporate identity. Individual colors can be chosen for the following items: <ul style="list-style-type: none"> • GUI elements, e.g. button for the material catalog, interactors to extend or move a wall, sliders in the kebab menu • walls; different colors for wall outline and filling are possible
Grid	If desired, a grid can be shown in the planning area.

Language Settings

Default language	Set the language which is used at the start of the pCon.roomplanner.
Available languages	Provide a selection of other languages to expand the group of users. Currently the following languages are available: Dutch, English, French, German, Italian, Polish, Portuguese, Romanian and Spanish.
Selectable languages for the data	Object data is available in: Czech, Danish, Dutch, English, French, German, Italian, Norwegian, Polish, Portuguese, Romanian, Russian, Spanish and Turkish.
Miscellaneous	Determine, if only one language shall be used for both user interface and object data.

Planning Options

Dialog 'Welcome'	Decide, whether the user of your room planning tool: <ul style="list-style-type: none"> • chooses directly one of the available room shapes • starts with an empty planning • opens its own planning • uploads a 2D floor plan
Planning area	Choose the size of the planning area. In addition to working with closed rooms the planning without walls is also possible. Furthermore you have to set the unit of measurement.
2D-View/3D-View	The pCon.roomplanner can be integrated as a pure 2D tool or supplemented by a 3D mode to get an interactive view of the planning results. Rotation (orbit mode) is also available.
pCon.catalog	You already have your own product selection on pCon.catalog? Then use this catalog by setting up an individual button for it in the online planning tool.
Scalable articles	You decide, if the articles inside of a planning shall be scalable.
Color selection	Define the color range for room elements, walls, floors and columns.
Configuration	Due to the optional connection to the pCon.configurator Online you get various configuration possibilities for articles.

Navigation by Using Different Menus

Application menu	Provide the following functions to your customers within the left navigation bar: New, Open, Import, Save as, Send by e-mail, Settings, Help, FAQ, Feedback, About. Imprint and data protection notice may be set up as links in the lower area of this menu.
Toolbar	The toolbar on top of the planning area includes important tools and functions like multiple selection, shapes, text, traffic routes, cameras and article list. Decide, which buttons will be important to be shown for your customers.

Navigation by Using Different Menus

Setup menu	Within the menu on the right hand side the user of the pCon.roomplanner controls for instance the display of the workspace, the floor or the walkways via sliders.
------------	--

Expressive Snapshots

Gallery	Your customers want to draw attention to their planning? They'd like to capture a shot of a single object? Enable the use of cameras in the planning tool. The images can be protected via digital watermark.
---------	---

Creation of an Article List

Settings for the article list	Decide, if the following information should be displayed and editable in the header of the article list: <ul style="list-style-type: none"> • address and cover letter • company logo • sender information • subject line • correspondence
-------------------------------	---

Article numbers	Choose between two display formats.
-----------------	-------------------------------------

Export of the article list	The article list can be exported as: pdf, excel, obk, obx.
----------------------------	--

Printout

Contact details	The following can be included into the print view: contact addresses, tips for the planning and manufacturer's notes.
-----------------	---

Sending a Request

Sending a request	Your customers shall be able to send a request regarding their planning or included objects directly to you? Simply integrate the applicable button and define the following details of the request form: <ul style="list-style-type: none"> • title (e.g. 'Request') • the amount of fields • the amount of required fields
-------------------	---

Storage and Distribution of Planning

Data export	Determine, which data formats are available to the customer when sharing a plan.
Configuration of the storage email	The sender's address and the subject of the storage email are configurable. Furthermore some fields as well as wordings for header and footer in an e-mail can be also set.
Transfer to pCon.planner	When selected, the planning will be exported to pCon.planner for further processing.

Catalogs and OFML data

Title	Choose between the original name of the OFML catalog or 'Catalog' as alternative title.
Access to the catalog	Using the individual icon in the lower right corner your user gets access to the manufacturer catalogs. You decide, on which level the customer will enter the catalog at start.
OFML elements	Determine, which settings of the OFML objects shall be visible to the user of pCon.roomplanner. Define the layers for these elements, for example user areas.
Material selection	EasternGraphics provides high quality materials for the room elements in planning. Alternatively you can integrate your own material library by using pCon.catalog.
Dimensioning	The dimensions of OFML objects can be displayed.
